

SKIN ON CARDBOARD

SEALING

SKIN

MAP

VACUUM

The FOX thermo sealer is the most compact, fully automated machine in our range of Thermo sealers. With a footprint of only 1.5 meters, it allows you to perform ATM-MAP, SKIN and SKIN on cardboard in the FOX S version.

This machine is fully motorized, featuring an internal pump in the basic version. Suited with a 7" TOUCH display, allows an immediate and intuitive view of all the data needed for work operations plus an instant overview of sensors and photosensor.

- Stainless steel structure
- Guides for plastic, polystyrene and cardboard trays.
- Photocell for colored trays

- The FOX S version: ATM-MAP, SKIN and SKIN on cardboard with the same mold!
- Easy and intuitive mold change
- Precise cutting with dies

- Motorized film wind and unwind
- Photocell for print mask reading
- Electrical system integrated into the machine
- System integrated with sensors
